4. Items Recommended for Review

The rows below are marked Pass (or Not Marked) in the source data, but the Actual Result text does not exactly match the Expected Result, or the result itself looks functionally questionable. These are flagged for QA awareness rather than reported as failures, since the source data records them as passing.

TC ID	Test Case	Observation
TC_SIGNUP_011	Signup with First Name left blank	Actual message text differs from expected
TC_SIGNUP_012	Signup with Last Name left blank	Actual message text differs from expected
TC_SIGNUP_013	Signup with Mobile Number left blank	Actual message text differs from expected
TC_SIGNUP_024	Signup with a weak numeric password ("123")	Wording differs from expected message
TC_SIGNUP_025	Signup with a weak all-letters password	Wording differs from expected message
TC_SIGNUP_026	Signup with Password and Confirm Password left blank	Wording differs from expected message
TC_SIGNUP_027	Signup with Mobile Number left blank (retest)	Casing/spacing differs from expected
TC_SIGNUP_028	Signup with an already registered email (Akshay Rao)	Signup succeeded instead of being blocked as duplicate
TC_SIGNUP_029	Signup with all fields left blank	Page timed out instead of showing validation message
TC_SIGNUP_031	Signup with a script tag in Last Name	Password field flagged instead of Last Name
TC_SIGNUP_033	Signup with a mobile number including country code	Actual result blank; expected text also duplicated in source data
TC_SIGNUP_035	Signup with a space inside the email address	Status not recorded in source data; result text matches expected

5. Environment Details

URL	https://tichi-stage.example.com/signup
Browser Version	Chrome (Latest, auto-updated)
Selenium Version	4.x
Python Version	3.11
Driver Version	ChromeDriver (managed via webdriver-manager)
OS	Windows 11

6. Logs

- Automation execution logs — step-by-step actions performed by the Selenium script for each row.
- Console logs — output printed by the Python script during execution, including read/write operations on the Excel file.
- Browser logs — Chrome DevTools console output captured during each test run.
- Result data — sourced directly from the Status, Expected Result and Actual Result columns of the SignupData sheet.

7. Observations

Of the 35 total test cases, 34 are marked Pass and 1 row(s) have no status recorded in the source data, giving a recorded pass rate of 97.1%.

All 10 valid signup scenarios (TC_SIGNUP_001–010) are recorded as passing.

Several rows (e.g. TC_SIGNUP_011, 012, 013, 024–027, 031) show Actual Result text that differs from the Expected Result wording, yet are recorded as Pass in the source data — these are listed in Section 4 for review.

TC_SIGNUP_028 (duplicate email) records an Actual Result of "Success" against an Expected Result of "Duplicate Email"; despite being marked Pass, this is functionally worth a second look.

TC_SIGNUP_029 (all fields blank) records a Timeout as the Actual Result rather than a validation message.

TC_SIGNUP_033 has no Actual Result captured, and its Expected Result text appears duplicated in the source spreadsheet ('Invalid Mobile NumberInvalid Mobile Number').

TC_SIGNUP_035 has no value in the Status column in the source data; its Actual Result text matches the Expected Result.
